

## Recognized Lawn Care Providers

If you see vehicles displaying the sign below, you'll know that the owner successfully completed a Lawn Care Certification Program, sponsored by the City of Rockport, Mission Aransas National Estuarine Research Reserve, and Texas AgriLife Extension Service.

Offered at no charge to area lawn care services and homeowners, the program included best management practices of lawn care, including impact on water quality; appropriate use of fertilizer, herbicides and pesticides; soil testing; disposal of yard waste; native plants; and water techniques. The one day program has been offered periodically since 2013.

Yard care providers who have completed the class include:
